### C Level 3 - Problem – 3

#### Instructions:

1. Do not discuss with any one while solving the problems
2. Do not use internet while solving the problems
3. Do not use books while solving the problems
4. Do the problems on paper/note book first.
5. Do not try to copy from others
6. Do the problems in an easy way.

```
*****
#include <stdio.h>
int sum14(int no);
int main()
{
    int number,result;
    scanf("%d",&number);
    result = sum14(number);
    if(result == 1)
        printf("Sum of Digits is 14");
    else
        printf("Sum of Digits is not 14");
    return 0;
}
int sum14(int no)
{
    int result;
    // Your Program Here
    return result;
}
*****
```

**Question:** *Get a number from user and Check whether the sum of digits is 14 and print the result. Write your code inside the function. Do not Change the format.*

**Example:** *Input: 59 Output: Sum of Digits is 14. Input :123 Output: Sum of digits is not 14*
