C Level 3 - Problem – 4

Instructions:

1. **Do not discuss with any one while solving the problems**
2. **Do not use internet while solving the problems**
3. **Do not use books while solving the problems**
4. **Do the problems on paper/note book first.**
5. **Do not try to copy from others**
6. **Do the problems in an easy way.**

****

```c
#include <stdio.h>
int isPrime(int no);
int main()
{
        int number,result;
        scanf("%d",&number);
        result = isPrime(number);
        if(result == 1)
                printf("Number is Prime");
        else
                printf("Number is not Prime");
        return 0;
}
int isPrime(int no)
{
        int result;
        // Your Program Here
        return result;
}
```
****

Question: ***Get a number from user and Check Prime or Not and print the result. Write your code inside the function. Do not Change the format.***

Example: ***Input: 61 Output Number is Prime. Input: 1200 Output: Number is not Prime.***
